In an extraordinary private wilderness park, an extraordinary group of students and volunteers are gathering to defend the citizens' most precious right: Their right to abundant, accurate, relevant information about those who govern or those who wish to replace them.

It is an historic occasion: conservatives and liberals joining together to protect their fellow Americans from the abusive, shameful emotional manipulations of today's campaigns.

In a pristine wilderness park preserved solely for interns and volunteers, they work in research, media, fundraising, public relations, information technology and even maintenance teams.

Make friendships and memories for a lifetime. Enjoy hiking, fishing, boating, tennis and horses while working in one of the most meaningful jobs you will ever have.

Join us in this non-partisan effort supported by two former presidents and dozens of leaders from both major parties in an effort that the U.S. News and World Report says, “Would make the Founders weep with joy.”
